The following is an examiner's statement of reasons for allowance: It is not obvious from the references that the reaction of the alkanediol with a tropane in the presence of 1,1'-carbonyldiimidazole would produce a nearly pure hydroxyalkyl tropane ester in high yield. Witness the complex mixtures obtained by Somers et al, US Patent 5,376,667. This is essentially the argument presented by applicants in their response to the rejection.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
